Hyperloop: The revolutionary technology that could change transport forever

We live in an age of unbelievable technological progress. To a visitor from the distant past, this would surely seem like a utopian age. Yet in many areas of life, things don't seem to have changed that much, and transportation is a woeful example of this. The roads are still lined with cars, the skies streaked with airliners. 20th century science fiction foresaw flying cars and teleporters; the 21st century settled for "Segways". Dreams never die, however, and the fantasy of futuristic transportation is very much alive right now as exemplified by a concept called Hyperloop. While is not as mind-shattering as a teleporter or as fun as a personal jetpack. The Hyperloop could revolutionize mass transit, shortening travel times on land and reducing environmental damage in the process.

An educated guess from one of the first civil engineer involved in the design of a real-world Hyperloop infrastructure tries to give some direction between hype and pragmatic design.

Dr. Eng. Andrea Santangelo Structural Civil Engineer, P.E.

Italian as citizenship but working in the four corners of the world, he made mostly of his 20-years experience between his native Country and the USA, working as a consultant for some of the most relevant Companies in the industrial and infrastructure field. He has offices in Catania, Italy, and Las Vegas, Nevada (USA)

Since 2015 he is actively involved in the design development of the infrastructure system to be built around the Hyperloop technology, cooperating with the most advanced hyperloop Companies, Universities and Research Facilities around the world.

MARCH OF THE INTELLECT, 1829 - UNITED KINGDOM

THIS IMAGINATIVE PRINT BY WILLIAM HEATH SATIRIZES THE SOCIAL EFFECTS OF STEAM POWER. BOTH TECHNOLOGICAL INNOVATION AND MODERN ARCHITECTURE ARE RIDICULED. STEAM POWER IS BLAMED FOR THE BREAKDOWN OF DISTINCTIONS BETWEEN THE SOCIAL CLASSES.

INTERESTINGLY, THIS PRINT MANAGES TO PREDICT COMMERCIAL AIR TRAVEL, CLEANING MACHINES, WINGSUITS, EXPRESS BUS SERVICES, AND PERSONAL AUTOMOBILES.

...AND A VACUUM POWERED TUNNEL FROM ENGLAND TO INDIA MIGHT HAPPEN TOO...

Hyperloop: The revolutionary technology that could change transport forever
